About Me

I am a passionate, self-taught Java developer who is learning and coding every day. I have built small projects like a product inventory system and a to-do list app. I'm actively working on more projects to grow my experience. I'm looking for an internship or entry-level opportunity where I can apply my skills, learn from others, and contribute to real-world software development.

Skills

- Java Programming (OOP, Exception Handling, Collections)
- Java 8 Features (Lambda, Streams)
- File I/O
- MySQL (basic level)
- Git & GitHub
- Problem Solving
- Project Development (Console-Based)

Projects

Product Inventory System

A console-based Java application to manage product stocks. Features include adding, editing, deleting products, and viewing product lists. Built using OOP principles and file-based storage.

To-Do List App

A simple task management tool built in Java. Allows users to add, remove, and update tasks with persistence using text files.

More Projects Coming Soon...

Currently developing a new Java project to strengthen my portfolio and demonstrate more advanced features.
